SKILLS

Backend
Java, Spring Boot, microservices, REST APIs, JWT, Node.js, PHP (Laravel), Python, C#/.NET

Frontend
Vue.js, Nuxt.js, HTML5, CSS3, JavaScript

Mobile
Flutter, Dart (Android, iOS), Firebase (FCM), Google Play / App Store publishing

Databases
PostgreSQL, MySQL
Oracle / PL/SQL: learning

DevOps
GitLab CI/CD, Git, Docker, Kubernetes (basics), Maven, Nexus, Linux (Debian, systemd)

Artificial intelligence
Machine Learning (Python), anomaly detection, predictive maintenance

Embedded systems & electronics
C, C++, STM32 and Arduino microcontrollers, FPGA (Quartus, ModelSim), sensors and integrated security

Tools
IntelliJ, Visual Studio, Android Studio, STM32CubeIDE, Arduino IDE

LANGUAGES

French: native
English: B2
Mooré

INTERESTS

Football · Technology innovation

Mohammad Ramadan TASSEMBEDO

COMPUTER ENGINEER — SOFTWARE, MOBILE, EMBEDDED SYSTEMS & ELECTRONICS

Computer engineer (5-year degree) with dual skills in software and electronics. Co-developer and maintainer of three business platforms in production: Eliyah Express (deliveries), Pegasus (electric motorbikes and battery swapping) and Phebus (solar kits), along with their Flutter mobile apps published on the stores. I work across the whole chain: Spring Boot REST APIs and microservices, Vue.js/Nuxt.js interfaces, Flutter mobile apps, PostgreSQL, GitLab CI/CD, Docker and Linux. On the electronics side: STM32 and Arduino microcontrollers in C/C++, FPGA (Quartus, ModelSim), sensors and the design of an integrated security system. Trained in machine learning (Python), I am looking for a role that connects software and hardware.

PROFESSIONAL EXPERIENCE

Full-stack & mobile developer — FIXED-TERM

Alioth System / Link2Digit · Ouagadougou · May 2025 – present

Co-developer and maintainer of three platforms in production, and Flutter mobile developer (Android and iOS) of their apps, from design to store publication.

- **Eliyah Express** — delivery and fleet management (admin.eliyah-express.link2digit.com): Spring Boot / PostgreSQL APIs secured with JWT and Node.js services, Nuxt.js dispatch console with a real-time map, dynamic filters on JSONB data, rework of biometric authentication, production incident resolution.
- **Eliyah Express Mobile** — Flutter app (Android and iOS) for customers and couriers: delivery requests and real-time tracking, OpenStreetMap / Google Maps with automatic fallback, background courier position sharing, Firebase push notifications (FCM). Published on Google Play (signed bundle, permission declarations); iOS version under Apple review (signing, APNs notifications, TestFlight).
- **Pegasus** — electric motorbikes and battery-swap stations (pegasus.link2digit.com): co-development and maintenance of the platform and admin interfaces.
- **Alioth Mobile** — Flutter app (Android and iOS) for Pegasus customers: battery swaps, recharges and contracts, map, mobile payment and wallet. Published on Google Play and the App Store.
- **Phebus** — solar kit management and monitoring (phebus.link2digit.com): Spring Boot microservice with Spring Cloud Config, PostgreSQL database, admin interface; deployment and operation on a Linux server (Debian, systemd), CSV data import.
- **Delivery pipeline** — GitLab CI/CD pipelines on most projects, Git, Docker containers, Maven artifacts published on Nexus, deployments on OVH and Raspberry Pi. Requirements gathering, corrective and evolutive maintenance, technical documentation and support for operations teams.

Web developer — INTERNSHIP

Alioth System · Ouagadougou · February – May 2025

Final-year project, the entry point to the platforms I maintain today.

Final-year project: integrated security system — INTERNSHIP

Ecom.High-Tech · Ouagadougou · March – September 2024

Design of an embedded security system: intrusion detection, access control and video surveillance, built on microcontrollers programmed in C/C++.

Laravel developer — INTERNSHIP

Ecom.High-Tech · Ouagadougou · January – February 2024

Built the e-commerce site yaare.shop (catalogue, orders, MySQL database).

Web developer — INTERNSHIP

Heven Tech · Ouagadougou · August – September 2022

EDUCATION

Engineering degree in Computer Science (5-year program)
École Supérieure Privée d'Ingénierie et de Technologies, Tunis · 2021 – 2024

Preparatory classes (CPGE PCSI)
Institut 2iE-EPF, Ouagadougou · 2019 – 2021

Scientific baccalaureate
Lycée de la Jeunesse, Ouagadougou · 2019

CERTIFICATIONS

- **NVIDIA DLI** (Nov. 2023): Applications of AI for Anomaly Detection; Applications of AI for Predictive Maintenance
- **Coursera** (Apr. 2023): Machine Learning with Python; Build a Full Stack App using React and Express
